thereby transferring the queued RS data to said target-base station;

transmitting, from said target-base station to said remote station, the queued BS data at a second BS data rate, with the second BS data rate greater than the first BS data rate, thereby transferring the queued BS data to said remote station;

transmitting, from said remote station to said target-base station, responsive to the queued RS data being transferred to the target-base station, at the first RS data rate; and

transmitting, from said target-base station to said remote station, responsive to the queued BS data being transferred to said remote station, at the first BS data rate.

REMARKS

By this amendment, applicant shows marked up version of claim 1, as amended. Applicant solicits allowance of the claim.

Respectfully submitted,

DAVID NEWMAN CHARTERED
